Professional Summary

Platform & Solutions Engineer with hands-on experience designing, building, and operating production platforms, cloud infrastructure, and enterprise systems.

- Experienced in taking end-to-end technical ownership of applications from solution design and development to deployment, automation, and production support.
- Worked across application engineering, cloud infrastructure, platform operations, and workflow automation.
- Strong focus on understanding complete systems, identifying root causes, and making well-informed engineering decisions through research, analysis, and practical implementation.
- Driven to build robust, scalable, and reliable technical solutions.

Professional Highlights

- Primary Technical Owner — Navdrishti
- Led Microsoft 365 Migration for 50+ Users
- Built CI/CD Pipelines for Multi-Environment Deployments
- Reduced Azure Infrastructure Costs by ~50%
- Designed Self-hosted Production Infrastructure

Core Competencies

- Platform Engineering
- Solution Architecture & Technical Problem Solving
- Application Engineering & Systems Integration
- Cloud & Infrastructure Management
- Production Systems Ownership
- Process Automation & Workflow Optimization

Technical Expertise

Cloud & Infrastructure: Microsoft Azure, Linux (Ubuntu), Virtual Machines, TrueNAS, DNS & Domain Management, Basic Networking

Application Engineering: React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Backend & Databases: PostgreSQL, Supabase, MongoDB, MySQL

DevOps & Automation: Git, GitHub, Docker, CI/CD, n8n, Zapier

Enterprise Platforms: Microsoft 365, Google Workspace, Zoho People, Zoho Bigin, WIX

AI-Assisted Engineering: ChatGPT, OpenAI Codex, Claude Code, GitHub Copilot, Cursor, Windsurf, Gemini, Prompt Engineering, AI-assisted Development Workflows

Programming: Java, Python (Basic)

Professional Experience

NextGenInnov8, Pune

Apr 2025 — Present

Platform & Technology Professional

- Took technical ownership of production platforms, cloud infrastructure, and internal technology systems, ensuring reliable operations and continuous improvements.
- Designed, developed, and deployed **Navdrishti**, a role-based student placement management platform, establishing CI/CD pipelines and managing development, staging, and production environments.
- Designed secure backend architectures using **Supabase (PostgreSQL)** with Role-Based Access Control (RBAC), Row Level Security (RLS), and scalable database structures.
- Managed Microsoft Azure infrastructure hosting production applications while optimizing cloud resources and reducing infrastructure costs by nearly **50%**.
- Designed, self-hosted, migrated, and maintained the organization's production **n8n** automation platform, evolving its architecture from SQLite to PostgreSQL for long-term production reliability.
- Maintained and enhanced the **BrainPulses** platform through production fixes, feature enhancements, UI improvements, and client-specific customizations.
- Led technical planning and coordination for an organization-wide Microsoft 365 tenant migration involving 50+ users, vendor coordination, migration activities, and post-migration support.
- Administered Microsoft 365, Google Workspace, Zoho, DNS, domains, and SaaS platforms supporting day-to-day organizational operations.
- Researched and implemented technical solutions improving platform reliability, automation, operational efficiency, and infrastructure scalability.
- Applied structured root-cause analysis and evaluated multiple solution approaches before implementing production changes.

Technical Achievements

- Primary Technical Owner — Navdrishti
- Microsoft 365 Tenant Migration (50+ Users)
- Self-hosted Supabase & n8n Infrastructure
- Automation Anywhere Deployment Recovery
- Azure Infrastructure Optimization (~50%)
- CI/CD for Multi-Environment Deployments
- Secure Wi-Fi Captive Portal
- Secure Remote NAS Architecture

Key Projects

Navdrishti

Primary Technical Owner

- Leading end-to-end technical ownership of a role-based student placement management platform currently in the final development, validation, and rollout phase.
- Designed application architecture, secure RBAC, scalable PostgreSQL database, and backend using Supabase.
- Built responsive React interfaces, audit logging, CI/CD pipelines, and multi-environment deployment workflows.
- Managed local, staging, and production environments supporting future platform scalability.

Tech Stack: React, TypeScript, Supabase, PostgreSQL, Docker, GitHub Actions, Azure

BrainPulses

Production Platform Maintainer

- Maintained production quiz platform through feature enhancements, UI improvements, production fixes, and client-specific customizations.
- Supported large-scale live quiz events and designed the BrainPulses 2.0 prototype architecture for improved scalability and maintainability.

Tech Stack: React, JavaScript, MongoDB, Azure Storage, n8n

Self-Hosted Supabase

Infrastructure & Database Engineer

- Designed and deployed a self-hosted Supabase platform on a Linux VPS supporting development, staging, and future production environments.
- Configured PostgreSQL, authentication, storage, Docker deployment, backups, updates, and secure infrastructure management.

Tech Stack: Supabase, PostgreSQL, Docker, Linux, VPS

Self-Hosted n8n

Platform Administrator & Automation Engineer

- Introduced and self-hosted the organization's first n8n automation platform, initially using SQLite before redesigning the production deployment with PostgreSQL.
- Deployed and maintained a secure Docker-based production environment with monitoring, backups, upgrades, and workflow troubleshooting.

Tech Stack: n8n, PostgreSQL, Docker, Linux, VPS

Education

Master of Computer Applications (MCA)

2023 — 2025

ASM's IBMR, Pune

CGPA: 7.57

Bachelor of Business Administration (Computer Applications)

2019 — 2022

ASM's CSIT, Pune

CGPA: 7.58

Professional Certifications

Anthropic

- Claude Code

Software Development

- Full Stack Developer (Java Plus) — Seed Infotech & NSDC
- Advanced Java & Web Programming — Anudip Foundation

Industry Simulations

- Software Engineering Job Simulation — Hewlett Packard Enterprise (Forage)
- Software Engineering Job Simulation — Wells Fargo (Forage)
